

Download Freezing Point Depression Lab Answers

We care about molality because freezing point depression is a colligative property, a property that depends on how many solute particles are in the solvent, not the kind of solute particles. Molality, m , is one piece of this "how many solute particles are present?" question. The Van 't Hoff factor is the second part of the "how many solute particles are present?" question. Labs. Demonstrate freezing point depression in this "We All Scream for Ice Cream" lab. Flinn Scientific, Inc.'s "Quick Freeze" is a simple demonstration of freezing point depression using club soda.; The "Changing the Freezing Point of Water with Salt" lab is self-explanatory. "Expanding on Ice" demonstrates how ice takes up more space than water. "The Rate of Solubility" lab can be adapted ...AP CHEMISTRY. Chemistry & Chemical Reactivity 6th Ed.
